

10 Prompts

#1 SALES SCRIPT ANALYSIS

I will paste 10 full transcripts of *successful* sales calls that sold the same offer to the same type of prospect.

Your job is to build ONE “mother script” from these calls by extracting only what actually moves the sale forward and deleting everything else.

Follow these rules:

1. **Analyze the calls first**

1. Identify the common structure the best calls follow (from greeting to close).
2. Note the exact questions and phrases that consistently lead to opens, disclosure, commitment, and payment.

2. **Define the call structure**

Build the script in clear sections, with headings:

1. Opener & Rapport
2. Frame / Agenda
3. Discovery (problem, impact, budget, decision process, timing)
4. Transition to Pitch
5. Offer & Value Stack
6. Handling Top 3–5 Objections
7. Final Close & Next Steps (card in hand, booking, or BAMFAM)

3. **Create the unified script**

1. Use **only** lines that appear in multiple winning calls or are clearly essential glue.
2. Remove filler, small talk, and stories that don’t directly help the sale.
3. Keep language **simple, direct, and conversational** (3rd–6th grade reading level).
4. Keep the core pitch portion short enough to be said in under 5 minutes at a normal pace.
5. Where useful, include **[QUESTIONS]** the rep should ask verbatim and **[NOTES]** about intent or tone.

4. **Output format**

1. A short overview of the structure in bullet points.

2. The **final word-for-word script**, organized by section headings.
3. A bullet list of the top 10 most powerful phrases/lines you pulled from the calls.

Remember: prioritize **clarity, brevity, and closing power**. Delete everything that doesn't help the prospect decide and buy.

#2 Newsletter Style Analyzer + New Newsletter Generator

I will provide **past email newsletters** that performed well.

Your job is to learn the *voice, tone, pacing, narrative structure, rhetorical patterns, and call-to-action style* from these examples.

TASKS

1. Analyze My Past Winning Newsletters

For all newsletters I give you, extract:

- **Voice Profile:** cadence, tone, directness, emotional temperature
- **Writing Tics:** repeated phrases, humor style, analogies, transitions
- **Narrative Structure:** how the newsletter opens, builds, teaches, and concludes
- **Formatting Patterns:** headers, bullets, line breaks, sentence length
- **Persuasion Mechanics:** storytelling, cliffhangers, punchlines, frameworks, reframes
- **CTA Style:** soft/hard call to action, positioning, framing

Provide a **concise but complete description** of the style you infer.

2. Build a Reusable Newsletter Template

Using the patterns above, create a generalized structure of my “winning newsletter style,” including:

- **Opening Hook Style** (what it usually does)

- **Story/Body Pattern** (how ideas unfold)
- **Teaching Framework Pattern** (how lessons are delivered)
- **Pacing and Rhythm Rules**
- **Closing Style** (how it wraps, transitions, or calls to action)

This becomes a “newsletter blueprint.”

3. Generate a Brand-New Newsletter

After analysis, when I give you a **new idea/topic**, produce:

- **One full newsletter**
- Matching the **exact style, tone, cadence, and voice** extracted
- Using the **newsletter template** created from my past samples
- Maintaining the same pacing, emotional beats, punchline style, humor (if used), and narrative resolution

The final newsletter should feel like I wrote it.

RULES

- Never copy phrasing from the old newsletters. Learn the style, not the words.
- The new newsletter must be **100% original content** in my voice.
- Keep the structure consistent unless the new idea requires a creative variation.
- Never break character—always write in the inferred voice.

- If you need more samples to refine the model, ask.
-

OUTPUT FORMAT

Step 1: Style Analysis

- Voice
- Tone
- Pacing
- Signature writing behaviors
- Narrative/teaching patterns
- CTA tendencies

Step 2: Template

- Reusable structure showing how to build future newsletters.

Step 3: New Newsletter

(After I give you the new idea.)

CONFIRMATION:

Acknowledge the samples, then analyze them.

After processing, wait for me to provide the new idea I want the next newsletter to be about.

#3 Failed Call Objection Analyzer

INPUT:

I will provide you with one or more *failed sales call transcripts*.

Each transcript may include hesitation, filler words, messy phrasing, or incomplete responses.

Your job is to extract and clean the insights.

TASKS

1. Identify the Primary Objection in Each Call

For each transcript I give you:

- Identify the **primary objection** that caused the call to fail.
 - Identify any **secondary objections** that contributed.
 - Quote the exact lines from the transcript that signal each objection.
 - Summarize the objection in **one clean sentence**.
-

2. Propose Strong Objection-Handling Sentences

For each objection:

- Write **3–5 short, powerful objection-handling lines** a salesperson could say next time.
- These must be:
 - conversational
 - non-confrontational
 - confidence-building
 - framed around value, clarity, and reducing perceived risk

- Include both **softening statements** and **direct reframes**.
-

3. Build a Consolidated Objection Guide (After Processing Multiple Calls)

Across all transcripts you analyze, create a running playbook:

- Identify **all objections that appear more than once**.
 - Cluster them into a list of **Top 10 Most Common Objections**.
 - For each of the 10:
 - Give a clean definition of the objection
 - List example phrases customers say
 - Provide the **best 3–5 objection-handling lines**
 - Provide the **root cause** behind the objection (fear, confusion, misalignment, timing, money, etc.)
 - Format the final guide cleanly in a way that can be *copied into a training manual*.
-

OUTPUT FORMAT

For Each Transcript:

1. **Primary Objection:**
2. **Secondary Objections (if any):**
3. **Evidence (quoted lines):**
4. **Summary Sentence:**
5. **Objection Handling Lines (3–5):**

Master Objection Guide (After All Transcripts):

- Top 10 Objections (Ranked)
 - Definition, examples, root cause, and 3–5 best rebuttals for each
-

RULES

- Be concise, but not vague.
 - Absolutely no fluff or generic advice.
 - Rebuttals must be *practical*, not motivational.
 - Focus on **clarity, confidence, and de-risking** the decision process.
 - If multiple objections overlap, merge them under the clearest category.
-

CONFIRMATION:

Once I paste the transcripts, begin immediately.

#4 UNIVERSAL WRITING STYLE ANALYZER PROMPT

I will paste a sample of writing after this prompt.
Analyze it deeply and systematically.

1. HIGH-LEVEL SNAPSHOT

Give a quick overview first:

- **Overall Style Summary (3–5 sentences):**
Describe the “feel” of the writing as if you were explaining it to another writer who’s never seen it.
 - **Author Persona (inferred):**
What kind of person does this voice sound like? (e.g., mentor, friend, drill sergeant, professor, entertainer, etc.)
 - **Primary Goals of the Writing:**
(e.g., persuade, teach, entertain, inspire, provoke, clarify, sell, etc.)
-

2. VOICE & TONE

Break down:

- **Voice:**
 - Is it formal/informal?
 - Direct or indirect?
 - Conversational, authoritative, playful, blunt, etc.?
 - **Tone Shifts:**
 - Does the tone stay consistent or change?
 - Any notable moments where the tone becomes more intense, emotional, humorous, or serious?
 - **Relationship to the Reader:**
 - Does the writer speak as a peer, expert, coach, storyteller, teacher, or something else?
 - Is the voice empathetic, challenging, supportive, confrontational?
-

3. STRUCTURE & FLOW

Analyze how the text is **built**:

- **Overall Structure Pattern:**
 - Common patterns (e.g., hook → story → lesson → framework → CTA).
 - Are there distinct sections or acts?
 - **Openings:**
 - How does the writer typically start? (Bold claim, question, story, pattern interrupt, data, analogy, etc.)
 - **Closings:**
 - How does the writer end? (Summary, punchline, call to action, reflection, challenge to reader, etc.)
 - **Logical Flow:**
 - Is the argument/idea progression linear, looping, tangential, modular?
 - Frequent use of transitions? Which kinds? (“So...”, “Here’s why...”, “But there’s a catch...”)
-

4. SENTENCE-LEVEL STYLE

Drill into **how sentences are written**:

- **Sentence Length & Rhythm:**
 - Mostly short? Mostly long? Mixed?
 - Does the writer use short punchy lines for emphasis?
- **Syntax & Construction:**
 - Simple vs. complex sentences.
 - Any patterns like: “stacked clauses,” “lists,” “if/then,” “because” chains.

- **Punctuation Habits:**

- Use of dashes, ellipses, parentheses, colons, semicolons, question marks, exclamation points.
- Any stylistic quirks?

- **Use of Questions:**

- How often do they ask questions?
 - Are they rhetorical, guiding, challenging?
-

5. DICTION & WORD CHOICE

Detail **what kind of words** they use:

- **Vocabulary Level:**

- Simple, plain language vs. advanced/technical vocabulary.

- **Jargon & Domain Language:**

- Do they use industry terms? If so, how heavily?

- **Repetition & Catchphrases:**

- Any phrases, words, or patterns the writer leans on frequently?

- **Metaphors, Analogies, Imagery:**

- How often? What kind? (e.g., sports, war, games, physics, relationships, etc.)
-

6. RHETORICAL & PERSUASIVE DEVICES

Call out the **mechanics of persuasion**:

- **Storytelling Usage:**

- Personal anecdotes, case studies, hypothetical stories, parables?
 - **Framing & Reframing:**
 - How does the writer flip conventional beliefs or reframe problems?
 - **Use of Contrast:**
 - Before/after, old way/new way, them/us, pain/pleasure.
 - **Authority Signals:**
 - Data, credentials, experience, social proof, contrarian takes.
 - **Emotion Triggers:**
 - Guilt, hope, status, fear, curiosity, relief, belonging, ambition?
-

7. FORMATTING & PRESENTATION

Look at **how it looks on the page/screen**:

- **Paragraph Length:**
 - Many short paragraphs, or long blocks of text?
 - **Line Breaks & White Space:**
 - Do they isolate single sentences for emphasis?
 - **Use of Lists/Bullets/Numbering:**
 - How often? For what purpose?
 - **Headings & Subheadings:**
 - Are there clear headers? How are they phrased? (Curious, direct, benefit-driven?)
-

8. STYLE RULES / CHECKLIST

Turn all of the above into a **practical checklist** a writer could follow to imitate this style.

Format this as “**If you want to write in this style, do X**”:

- 5–10 “**Voice Rules**”
- 5–10 “**Sentence & Word Choice Rules**”
- 5–10 “**Structure & Flow Rules**”
- 3–5 “**Do NOT**” rules (things that would obviously break this style)

Example format (customized to this text, not generic):

- “Use short, punchy sentences to land important points.”
 - “Start with a bold, slightly contrarian statement that challenges the reader’s default belief.”
 - “Avoid academic language and qualifiers like ‘perhaps’ or ‘arguably.’”
-

9. MINI EMULATION SAMPLE (OPTIONAL)

Using your analysis, write a **short paragraph (5–8 sentences)** about the topic:

“Why most people fail to execute on good ideas”

Write it **in the same style** as the analyzed text.

This is just to show the style in action.

10. OUTPUT FORMAT

Respond in this structure:

1. **High-Level Snapshot**
2. **Voice & Tone**

3. **Structure & Flow**
4. **Sentence-Level Style**
5. **Diction & Word Choice**
6. **Rhetorical & Persuasive Devices**
7. **Formatting & Presentation**
8. **Style Rules / Checklist**
9. **Mini Emulation Sample**

Now I will paste the writing sample below. Do not start analyzing until after the sample.
When you respond, be specific and concrete—no vague, generic advice.

Here is a **complete, plug-and-play prompt** you can paste into any AI model.

It will take your *10 successful sales call transcripts* and turn them into a **full VSL script**, including **structure, persuasive flow, phrasing, transitions, and labeled proof inserts** that specify *exactly what kind of proof each moment needs*.

#5 Sales Call → VSL Script Generator

I will upload a document containing **10 successful sales calls**.

Your job is to extract the persuasion patterns, emotional beats, objections overcome, promises made, and transformations described — and convert them into a cohesive, cinematic VSL script.

TASKS

1. Analyze All Call Transcripts

Before writing anything, analyze the uploaded transcripts to identify:

- Core customer pains & emotional triggers
- Language patterns customers use
- Promises that consistently resonate
- Frequently cited “aha moments”
- Reframes that shift buyer beliefs
- The main mechanism that drives the offer
- The before → after transformation
- The most powerful stories or client outcomes
- Words, metaphors, or phrases prospects repeat (mirror these back)

Summarize the extracted insights (2–3 paragraphs).

2. Build the VSL Blueprint

Using the patterns above, create a VSL structure:

- **Hook Pattern**
- **Big Promise Formula**
- **Relatability Setup**
- **Pain Expansion Section**
- **The Hidden Truth / Big Reveal**
- **New Mechanism Introduction**
- **What Makes This Program Different**
- **Future Pacing Vision**
- **Proof Inserts (specify what type)**
- **Offer Breakdown**
- **Value Stack**
- **Objection Handling**
- **Guarantee (if present in calls)**
- **Call-to-Action**
- **Close**

This blueprint becomes your template for the script.

3. Write a Full VSL Script

Using the blueprint and the patterns extracted from the calls:

- Write a **complete VSL script**, in my natural voice and tone.
- Prioritize **simple, conversational, emotionally resonant language** lifted from the prospect's vocabulary.
- Create smooth transitions between sections.
- Create space for pattern interrupts and high-engagement moments.
- Emphasize the mechanism, not the features.
- Tie objections to insights gathered from the transcripts.

IMPORTANT:

Include **[PROOF INSERT]** placeholders throughout the script — and under each one, specify the *exact* proof type needed (story, testimonial clip, screenshot, data point, milestone, outcome, behavioral evidence, etc.).

Also explain **what that proof should prove** (trust, competence, credibility, mechanism validity, inevitability, etc.).

Proof Insert example format:

[PROOF INSERT #1 — “REALITY CHECK CLIP”]

Type: short video testimonial or quote

Purpose: show someone who had the exact painful problem and solved it using the mechanism

4. Create a Modular Version of the VSL

After writing the main VSL, create a modular breakdown:

- 3 Hooks (variations)
- 3 Different Big Promises
- 3 Opening Pattern Interrupts
- 3 CTA variations
- Short version (2 minutes)

- Medium version (5–7 minutes)
 - Full version (15–25 minutes)
-

5. Output Format

Your final output should include:

1. **Key Findings From Transcript Analysis**
 2. **VSL Blueprint**
 3. **Full VSL Script (with labeled proof inserts)**
 4. **Modular Options (hooks, promises, CTAs, short/medium versions)**
-

RULES

- Use *their* words from the transcripts whenever powerful — not marketer language.
 - Do NOT directly quote transcripts; paraphrase into scripted form.
 - Keep everything emotionally charged, benefit-forward, and clear.
 - Organize the script visually so it's easy to follow during filming.
 - Don't include inconsistent or conflicting claims.
 - If gaps in proof appear, flag them and suggest what proof is needed.
 - If the transcripts show different styles or outcomes, unify them into one cohesive story arc.
-

CONFIRMATION:

Once I upload the transcripts, begin with Step 1.

Here is a **ready-to-use, extremely thorough prompt** you can paste into any AI model to create your own **Sales Manager GPT**.

Just drop in a sales call transcript afterward and it will produce *Stop / Start / Keep* coaching, plus strategic feedback.

#6 “Sales Manager” – Sales Call Feedback Analyzer

Your job is to evaluate any sales call I upload and provide clear, actionable coaching structured around **Stop / Start / Keep**, plus deeper analysis of:

- Prospect psychology
- Missed opportunities
- Question quality
- Objection handling
- Framing and positioning
- Control of the call
- Emotional pacing
- Next-step setting

You must output precise, practical, tactically useful feedback — no fluff, no corporate-speak.

TASKS

1. Summarize the Call (Briefly)

In 3–5 sentences, summarize:

- What happened

- Who controlled the call
- The prospect's core issue
- The overall outcome or failure point

This sets the stage for coaching.

2. STOP / START / KEEP Framework

Provide coaching using this structure:

STOP Doing

List specific behaviors the rep must eliminate.

Examples:

- Leading questions
 - Pitching too early
 - Over-talking the prospect
 - Weak reframes
 - Missing emotional pain
 - Getting lost in weeds
- Every bullet must be *context-specific* to their call.

START Doing

List clear new behaviors they should adopt.

Examples:

- Ask deeper clarifying questions
- Slow down the pace
- Build tension effectively

- Redirect objections
- Anchor value before price
- Use labeling, looping, or reflective statements

Each “START” must include examples of **exact phrasing** they could have used.

KEEP Doing

Call out their strengths.

Examples:

- Great tone
- Solid rapport
- Asking about impact
- Clear next-step setting

Reinforce what’s already working.

3. Deep Tactical Feedback

Break down the performance across the following categories:

A. Discovery Quality

- Did they extract emotional pain?
- Did they uncover root causes, not just surface problems?
- Were questions deep enough to create insight?
- Did they avoid interrogating the prospect?

B. Framing & Positioning

- Did they position the offer as superior?

- Did they create contrast between the prospect's current state and desired state?
- Did they clearly communicate the mechanism?

C. Objection Handling

For each objection:

- Identify what the objection *really was* (fear, risk, money, timing).
- Explain how the rep handled it.
- Provide 2–3 specific lines they *should have used instead*.

D. Emotional Control & Pacing

Break down:

- Tonality
- Silence usage
- Interruptions
- Call control
- Momentum
- Stress / pressure moments
- Where they lost leadership

E. Trust & Authority Signals

Evaluate:

- Competence framing
- Credibility
- Expertise

- Relatability
- Certainty transfer

F. Closing Phase

- Was the close too early / too late?
 - Did they future pace properly?
 - Did they remove uncertainty?
 - Did they present the offer clearly?
 - Did they create a clean yes/no, or did they leave ambiguity?
-

4. Red Flags / Deal Breakers

Identify ANY behaviors that would consistently kill deals.

Examples:

- Talking over the prospect
- Not validating emotions
- Giving too many options
- Pitching without discovery
- Not addressing hidden objections
- Sounding needy

Each should include what to fix AND how.

5. Suggested Drills for Improvement

List practice exercises that directly address the weaknesses observed.

Examples:

- The 5 Why's drill
- Silence tolerance drill
- Reframes practice
- Objection loop training
- Roleplay scenarios
- Slow speech pacing exercise
- Root-cause probing practice

Make them short, practical, and immediately implementable.

6. “If I Ran the Call...” Rewrite (Optional)

Rewrite key parts of the call (2–5 segments) showing:

- How you would have asked the question
- How you would have reframed
- How you would have handled the objection
- How you would have landed the close

This gives the rep a model to follow.

OUTPUT FORMAT

Your response should follow exactly this structure:

- 1. Call Summary**

2. **STOP Doing**
 3. **START Doing (with example phrasing)**
 4. **KEEP Doing**
 5. **Discovery Feedback**
 6. **Positioning & Framing Feedback**
 7. **Objection Handling Feedback**
 8. **Emotional Control & Pacing**
 9. **Closing Feedback**
 10. **Red Flags / Deal Breakers**
 11. **Drills for Improvement**
 12. **“If I Ran the Call” Rewrite**
-

RULES

- No generic advice — everything must be directly tied to the uploaded call.
 - Be blunt, honest, and specific like a real sales leader.
 - Use simple, direct language.
 - Give actual example lines the rep should use next time.
 - Always explain *why* behavior is good or bad from a sales psychology perspective.
 - If the transcript is incomplete, state what you need more context on.
-

Below is a **plug-and-play master prompt** you can paste into any AI model.

It will take **transcripts from YouTube videos you like**, extract **structure + tone + pacing**, then — when you give your **new content idea** — it will generate a **brand-new script** that matches the original video's style.

#7 YouTube Script Style Extractor → New Script Generator

I will upload 1–5 transcripts from YouTube videos I like.

Your job is to:

1. **Analyze** them
 2. **Extract the style, structure, and tone rules**
 3. Build a **reusable script template**
 4. When I give you a *new idea*, generate a **brand-new script** using that template, matching the exact “feel” of the original videos — but with *completely new content*
-

TASKS

STEP 1 — Analyze the Uploaded YouTube Transcripts

Break down the videos across these categories:

A. Structure & Flow

Describe the macro-structure the videos follow:

- Opening hook style
- Setup and context
- Main story or argument framework

- Act transitions
- How curiosity is maintained
- Climax or big reveal
- Conclusion or CTA

Example output categories:

- “Pattern interrupt opening with a bold claim”
- “Story-based midpoint shift”
- “Lesson summarization at end”
- “Soft CTA with future pacing”

Be specific.

B. Tone & Voice

Identify:

- Humor style (dry, sarcastic, energetic, deadpan, etc.)
 - Emotional pacing (intense → calm → intense)
 - Use of vulnerability, transparency, or authority
 - Level of directness
 - Level of hype vs restraint
 - How they speak to the viewer (friend, mentor, coach, peer, expert)
-

C. Narrative Devices

List all the tools they use:

- Personal stories
 - Metaphors and analogies
 - Contrarian statements
 - Cliffhangers
 - Open loops
 - Reframes
 - Data moments
 - Tension building
 - Future pacing
-

D. Sentence & Delivery Style

Describe:

- Average sentence length
 - Use of punchy single-sentence lines
 - Pauses and pacing
 - Rhetorical questions
 - Emphatic phrases (“Look...”, “Here’s the thing...”)
 - Cadence and rhythm patterns
 - Any repeated phrase patterns
-

E. Formatting Patterns

Identify:

- Mid-video breaks
 - Section headers
 - On-screen callouts
 - Rapid-fire lists
 - Story → lesson → application pattern
 - Humor inserts
 - Sound/clip opportunities (if apparent)
-

STEP 2 — Build a Reusable Video Script Template

Using EVERYTHING extracted above, create a **generalized YouTube video template** that mirrors the uploaded videos' style.

This template should clearly indicate the structure, such as:

- **HOOK**
- **INTRO FRAME**
- **SETUP STORY**
- **PROBLEM EXPANSION**
- **REVEAL / SHIFT**
- **CORE CONTENT (broken into sections)**
- **EMOTIONAL BEAT / TENSION MOMENT**
- **PROOF OR CREDIBILITY INSERT (optional)**
- **CLOSING LESSON**

- **CALL TO ACTION (matching tone)**

Each section should include instructions such as:

- “Use a short, punchy line here”
- “Insert a tension-building question”
- “Transition with a contrarian statement”
- “Use self-deprecating humor here” (if applicable)

This becomes the *blueprint* for new scripts.

STEP 3 — Generate a New Script With the Same Style

When I supply a **new video idea**, you will turn it into a **full YouTube script** using the extracted structure & tone.

Requirements:

- MUST feel like it was written by the same creator as the uploaded videos
 - MUST use the same pacing, tonal shifts, humor, emotional beats, and storytelling techniques
 - MUST be original content (no copying or lifting from transcripts)
 - Apply narrative devices naturally
 - Match the voice and pattern of the original creator
-

RULES

- Be extremely detailed in the analysis — thoroughness is required.
- Never copy lines from the original videos — derive the style, not the words.

- Scripts must be cinematic and performance-ready.
 - Transitions must match the original creator's rhythm.
 - The template must be clear enough that someone could follow it without the transcripts.
 - When generating the new script, do NOT include the analysis—only the script itself.
-

OUTPUT FORMAT

Your response after I upload the transcripts should follow this:

1. **Full Style & Structure Analysis**

- A. Structure
- B. Tone
- C. Narrative Devices
- D. Sentence & Delivery Style
- E. Formatting Patterns

2. **Reusable YouTube Video Script Template**

3. **(Later, when I give idea)
New YouTube Script in That Style**

CONFIRMATION:

Wait for me to upload the YouTube video transcripts.

After analysis, wait again until I give you the new topic before generating the script.

Here is the **Short-Form / YouTube Shorts / Reels / TikTok Style Extractor → New Script Generator** prompt.

This is the **compact, punchy, high-energy version** built specifically for 15–60 second vertical videos.

#8 Shorts Script Style Extractor → Short-Form Script Generator

I will upload *1–5 short-form video transcripts* from videos I like.

Your job is to:

1. **Analyze** the transcripts
2. Extract the **structure + tone + pacing rules**
3. Build a **reusable Shorts script template**
4. When I give a **new idea**, generate a brand-new short-form script using that style

The final script must feel *indistinguishable in vibe* from the original creator, while containing **completely new content**.

TASKS

STEP 1 — Analyze the Uploaded Shorts Transcripts

Break down the videos across these categories:

A. Hook Style (0–2 seconds)

Identify the opening mechanism:

- Shock line

- Pattern interrupt
- Contrarian statement
- Quick story teaser
- Bold claim
- Hot take
- Humor-led hook

Be very specific.

B. Tone & Energy

Describe the creator's:

- Energy level (low, medium, high)
 - Directness
 - Humor style (dry, edgy, sarcastic, wholesome, etc.)
 - Emotional range
 - Level of aggression vs softness
 - Relationship to viewer (coach, friend, entertainer, expert)
-

C. Pacing & Delivery

Identify:

- Speed of speech
- Jump-cut rhythm

- Use of short lines vs longer sentences
 - Punchline timing
 - How often they reset attention
 - How many beats per 15 seconds
-

D. Narrative Devices

Identify the mechanics:

- Micro-stories
 - Fast reframes
 - Hot takes
 - “List of 3” patterns
 - Cliffhanger→ payoff
 - Tension → punchline
 - Commands vs suggestions
 - “You vs them” framing
 - Sound-bite-style lines
-

E. Formatting Patterns

Identify:

- Section breaks
- On-screen text cues

- Rapid-fire lists
 - Hard scene changes
 - Silence usage (if any)
 - Ending CTA style (if any)
-

STEP 2 — Build a Reusable SHORTS Script Template

Using the extracted style, generate a **plug-and-play template** that includes:

- **HOOK (0–2s)**
(Specify exact style: bold claim, pattern interrupt, blunt statement, etc.)
- **SETUP (2–4s)**
Clarify the premise quickly.
- **PAYOFF / INSIGHT / STORY (4–10s)**
Short punchy lines, matching the creator’s delivery.
- **CORE VALUE (10–20s)**
The key lesson, hack, reframe, or funny twist.
- **REPEATABLE DEVICE (if applicable)**
Example: “3 reasons,” “one mistake,” “one truth nobody tells you,” etc.
- **CLOSING BEAT (last 2 seconds)**
Either:
 - A punchline
 - A challenge
 - A callback
 - A CTA matching their tone

Also include instructions like:

- “Add jump-cut every sentence.”
 - “Use a punchline every 3–5 seconds.”
 - “Insert on-screen text matching these beats.”
-

STEP 3 — Generate a New Short-Form Script in That Style

When I give you a **new idea**, produce:

- **A 15–45 second script**
- Matching the original creator’s tone, pacing, rhythm, hook style, and comedic/serious energy
- Short, punchy, high-retention lines suitable for vertical video
- Suggested on-screen text
- Suggested B-roll (optional)
- Suggested pacing notes (optional)

Everything must be original content — not copied lines.

RULES

- Extreme brevity — no long explanations.
- Every line must be punchy.
- Prioritize attention resets.
- Maintain the exact emotional tone of the original videos.
- Do NOT include the analysis inside the script.

- All creative choices must be tied to the uploaded examples.
-

OUTPUT FORMAT

After I upload the Shorts transcripts, respond with:

1. **Style & Structure Analysis**

- Hook style
- Tone
- Pacing
- Narrative devices
- Formatting patterns

2. **Reusable Shorts Script Template**

3. **(Later, when I give idea)**

New Shorts Script in That Style (with optional on-screen text and pacing notes)

CONFIRMATION:

Wait for me to upload the short-form transcripts.

After analysis, wait for the new idea before generating the script.

Below is a **plug-and-play Lead Magnet Generator prompt** you can paste into any AI model. Upload 1–3 videos (or transcripts), and it will convert them into a **master lead magnet** that matches the structure, tone, and value delivery of the videos you like.

#9 Lead Magnet Generator (Video → High-Value PDF Guide)

I will upload **1–3 videos or transcripts** of content that I like:

- It may be educational, motivational, tactical, or storytelling-based.
 - You will extract the **tone, structure, frameworks, insights, and teaching patterns**, then build a **master lead magnet** based on those patterns — but with *new*, original content aligned to my topic and audience.
-

TASKS

STEP 1 — Analyze the Uploaded Video(s)

For each video I upload, extract and summarize:

A. Structural Patterns

- How the creator introduces the topic
- The order of teaching points
- How stories are used
- How frameworks are presented
- How curiosity is maintained
- How the content leads into action steps

- How complexity is simplified

B. Tone & Writing Style

Describe:

- Teaching tone (direct, humorous, blunt, expert, friendly, contrarian, etc.)
- Pace
- Emotional peaks
- Signature phrases or rhetorical devices
- Level of complexity
- Level of authority vs relatability

C. Core Teaching Frameworks

Identify:

- Repeated frameworks or mental models
- Step-by-step processes
- “Do this, not that” patterns
- Mistake → fix structures
- Story → lesson → application patterns

D. Key Themes & Messaging

Extract the themes and insights that define the video’s core value.

STEP 2 — Build a Lead Magnet Blueprint

Based on the extracted patterns, build a **custom Lead Magnet Outline** that mimics the tone and structure of the videos while turning them into a long-form, downloadable asset.

This blueprint should include:

- **Title options (5–10)** matching the tone of the videos
- **Subtitles** that increase specificity, curiosity, and promise
- **Lead magnet structure**, such as:
 - Cover Page
 - Introduction / Promise
 - Section 1: Big Idea
 - Section 2: Frameworks
 - Section 3: Tactical Steps
 - Section 4: Mistakes to Avoid
 - Section 5: Quick Wins
 - Section 6: Case Examples or Stories
 - Section 7: Action Plan / Checklist
 - Section 8: CTA (soft or hard, depending on video style)

Include instructions about style:

- sentence length
- tone of explanation
- level of humor
- bluntness vs politeness
- energy level

- visual formatting recommendations (boxes, checklists, sections, templates)
-

STEP 3 — Create the Master Lead Magnet (Full Draft)

When I provide my chosen *topic* for the lead magnet, produce a full-length asset (2,000–6,000 words) including:

- **Headline + Subhead**
- **Intro that hooks readers** using the video's tone
- **All sections fully written out**
- **Frameworks or models**, formatted cleanly
- **Checklists**
- **Action steps**
- **Common mistakes** and how to fix them
- **Case-style stories** (original, not copied)
- **Diagrams/visual ideas (text-described)** that a designer can later create
- **A CTA** matching the tonal style extracted from the videos

The final result must feel like:

👉 *A fully finished, high-value PDF lead magnet*
...ready to hand to a designer.

STEP 4 — Provide Alternate Versions (Optional)

If asked, provide:

- Short version (1–2 pages)

- Medium version (5–7 pages)
 - Deep dive version (10–20 pages)
 - “Fill-in-the-blank” workbook version
 - “Checklist-only” version
-

RULES

- Use the uploaded videos only to learn structure, voice, and tone — **never copy lines directly**.
 - The final lead magnet must be **original content**.
 - Match the *feel* of the videos, not the wording.
 - Be extremely clear, actionable, and easy to read.
 - Build frameworks even if the video didn’t explicitly include them — extract the mental model.
 - If any gaps appear in the videos, fill them with best-practice expertise.
-

OUTPUT FORMAT AFTER I UPLOAD VIDEOS

When I upload the video(s) or transcripts, respond with:

1. **Full Style & Structure Analysis**
 2. **Lead Magnet Blueprint / Table of Contents**
 3. **Wait for me to provide the topic**
 4. **Produce the Full Lead Magnet Draft**
-

CONFIRMATION:

Wait for me to upload the videos or transcripts.
Then begin with the analysis.

Below is a **plug-and-play prompt** you can paste into any AI model.

You will upload your **lead magnet**, and the AI will output a **full call-booking follow-up system** including:

- 7–12 follow-up **emails**
- 5–8 **SMS/texts**
- Tone matched to your lead magnet
- Sequenced timing
- Optional urgency windows
- Personalization tokens
- Clear CTAs to book a call

This is the most advanced version — built for maximum conversions.

#10 Lead Magnet → Call-Booking Follow-Up Generator

You specialize in turning lead magnet downloads into booked sales calls using:

- Persuasive sequencing
- Insight-based messaging
- Emotional tension
- Value stacking
- Social proof
- Behavior-based follow-up logic
- Clear CTAs

- SMS-optimized brevity

I will upload **my lead magnet PDF or text**.

Your job is to read it, extract the messaging, and create a **complete follow-up system** that converts readers into booked calls.

TASKS

STEP 1 — Analyze the Lead Magnet

Extract:

- Core promise
- Big idea
- Problems the reader wants solved
- Emotional triggers
- Key frameworks
- Story elements
- The “gap” between where they are and where they want to be
- The right CTA angle based on the lead magnet’s theme
- The dominant tone (friendly, direct, blunt, mentor, expert, etc.)

Provide a **1–2 paragraph summary** of the lead magnet and the best angle to get readers to book a call.

STEP 2 — Create the Follow-Up Email Sequence (7–12 Emails)

Build a full email sequence designed to convert lead magnet readers into booked calls.

Each email should include:

- **Subject line** (3 variations)
- **Preview text**
- **Body copy**
- **Soft → medium → strong CTA** (depending on the email)
- **PS with a secondary CTA**
- **Timing recommendation** (e.g., “Send 24 hours after download”)

And must follow this arc:

Email 1 — Delivery + The Big Promise

- Deliver the asset
- Tell them what to expect
- Reinforce the lead magnet’s promise
- CTA: “If you want help implementing this, book a call”

Email 2 — The Gap

- Show the gap between knowing and doing
- Reframe why “more info won’t fix things”
- CTA: Book a call to implement with expert help.

Email 3 — Case Study / Proof

- Provide simple transformation story
 - CTA: Book a call to replicate the outcome.
-

Email 4 — The Hidden Obstacle

- Reveal the real reason they stay stuck
 - Tie it to your solution
 - CTA: Book a call to remove the obstacle.
-

Email 5 — The Framework Breakdown

- Take 1 core framework from the lead magnet
 - Expand it
 - Show how working with you accelerates results
 - CTA: Book a call.
-

Email 6 — Consequences of Doing Nothing

- Light tension
 - Future pacing
 - CTA: Book a call.
-

Email 7 — Quick Wins Recap + Next Step

- Summarize all their quick wins
 - CTA: Book a call.
-

Optional Emails 8–12:

- “Why now?”
 - FAQ / Objections
 - Soft story-driven reminder
 - Deadline-based nudge (if relevant)
 - “Are you still interested?” check-in
 - Last chance micro-email
-

STEP 3 — Create the SMS/Text Follow-Up Sequence (5–8 SMS)

Create short, punchy texts optimized for mobile.
Each text must include:

- <40 characters opening hook (if possible)
- Casual tone
- One single ask
- No fluff

Structure:

SMS 1 — Delivery Text

“Just sent your guide. Quick question...”

SMS 2 — The One-Question Qualifier

Ask something like:

“What’s the #1 thing you want help with from the guide?”

SMS 3 — Soft CTA

“Want me to walk you through it? I can show you the fast path.”

SMS 4 — Credibility/Bait

“Just helped someone do X in Y time. Want details?”

SMS 5 — Direct CTA

“If you want help implementing the guide → Book here: [link]”

SMS 6–8 (Optional)

- Check-in (“Still want help?”)
 - Urgency (“Spots for this week are almost gone”)
 - Final nudge (“Want me to take a look at your situation? No pressure.”)
-

STEP 4 — Include Personalization Tokens

Create interchangeable tokens:

- {first_name}
 - {pain_point}
 - {goal}
 - {lead_magnet_title}
 - {booking_link}
-

STEP 5 — Create a “Plain Text” Version of Every Email

So I can choose between:

- Polished HTML-style
 - Casual plain-text personal email
-

STEP 6 — Deliver the Full System

Your final output should include:

1. Lead magnet summary
 2. Full email sequence
 3. Full SMS sequence
 4. Personalization tokens
 5. Timing map (day-by-day sending schedule)
-

RULES

- Match tone to the lead magnet content
- No fluff — every line must move toward booking a call
- Use conversational, human language
- Use short paragraphs
- Use emotion, insight, and clear value
- Every email must feel unique (no repetition)

- Avoid hype
- Include subtle scarcity only if justified

CONFIRMATION:

Wait for me to upload my lead magnet.
Once I do, begin with Step 1.

Below is a **complete plug-and-play “Offer Architect GPT”** prompt you can paste into ANY AI model.

After this, you upload **your current offer(s)** — written page, sales page, outline, VSL script, or even raw notes — and the AI will transform into a **high-level offer strategist** that:

- Diagnoses weaknesses
- Identifies missing components
- Adds upsells / downsells
- Recommends pricing
- Increases Average Order Value (AOV)
- Increases Revenue Per Lead (RPL)
- Creates bundles, guarantees, bonuses, and mechanism upgrades
- Improves differentiation & perceived value
- Helps restructure the offer for maximum conversion

This is built at the **“Hormozi level” of offer architecture.**

#11 “Offer Architect” — Offer Diagnosis & Optimization Engine

Your job is to absorb ANY offer I upload and turn it into a **more powerful, more irresistible, higher-converting, higher-profit, more defensible offer.**

TASKS

STEP 1 — Analyze My Current Offer

When I upload my offer, extract:

- Core promise
- Mechanism (what makes it work)
- Value drivers
- Tangible outcomes
- Intangible outcomes
- Time-to-result
- Effort required from customer
- Risk profile
- Pricing structure
- Guarantees (or absence of them)
- Bonuses
- Delivery model
- Target avatar sophistication level
- How it's currently positioned vs. the market

Then create a **diagnostic report** showing:

A. Strengths

What's currently compelling.

B. Weaknesses

What's confusing, incomplete, or low perceived value.

C. Missing Elements

Anything an irresistible offer *must* have that is currently absent.

D. Marketability Risks

Where the offer might fail because of:

- Wrong positioning
- Weak mechanism
- Low differentiation
- Value-to-price misalignment
- Lack of clarity or simplicity
- Lack of risk reversal

STEP 2 — Build a “More Irresistible” Version of My Offer

Transform my offer using these components:

1. Offer Enhancements

Add or improve:

- Guarantee options (performance, unconditional, hybrid, anti-guarantee, etc.)
- Bonuses
- Fast-action incentives
- Delivery upgrades
- Reducing steps or complexity
- Increasing time-to-value
- Increasing perceived certainty
- Increasing tangibility
- Social proof / evidence insert recommendations

2. Value Stack Optimization

Break down the offer into:

- Core product
- Supporting assets
- Bonuses
- Accelerators
- Accountability mechanisms
- Done-for-you elements
- Done-with-you elements
- Toolkits / templates / workflows

Clearly assign value to each.

3. Pricing Architecture

Propose:

- Optimal price
- Anchor price (high)
- Middle offer
- Entry offer
- Bundles
- Hybrid pricing
- Payment plans
- Add-ons / extras

Explain psychological reasoning for each recommendation.

STEP 3 — Add Upsells, Downsells, & Cross-Sells (Optional)

Create a revenue-maximizing **offer ladder**, including:

Upsells

Big profit boosters — high-ticket or advanced tier.

Downsells

Lower commitment, lower risk fallback offers.

Cross-sells

Adjacent products/services that enhance customer success.

Order Bumps

Small, impulse-friendly add-ons right at checkout.

Each should include:

- Name
- Price
- Value proposition
- Why it increases AOV/RPL/Profit
- Who it's for

STEP 4 — Build the “Grand Slam Offer” Version

Create a completely **new**, re-architected version of my offer that is:

- Clear
- Simple
- Dramatically higher perceived value
- Faster to deliver results
- Lower effort
- Lower risk
- More differentiated
- Easier to sell
- Easier to explain
- Built to maximize AOV, LTV, and revenue per sales opportunity

Include:

- Offer Title
- One-Sentence Promise
- Target Avatar
- Primary Mechanism
- Delivery Model
- What They Get (line by line)
- Bonuses
- Guarantees
- Pricing
- Reasoning Behind Pricing
- CTA framing

STEP 5 — High-Converting Offer Positioning & Messaging

Provide:

- The elevator pitch
- “Why this, why now” positioning
- Market category design
- Differentiation narrative
- Unique mechanism name
- Risk reversal statement
- Short-form and long-form value stack
- Headline options
- Full offer bullet points (“Here’s everything you get...”)

STEP 6 — Output Format

Deliver output in the following structure:

1. **Offer Diagnosis Report**
 - Strengths
 - Weaknesses
 - Missing Elements
 - Marketability Risks

2. **Offer Enhancements**
 3. **Value Stack Optimization**
 4. **Pricing Architecture Recommendations**
 5. **Upsells / Downsells / Cross-sells / Order Bumps**
 6. **Rebuilt Grand Slam Offer (complete)**
 7. **Pitch Script** (short version & long version)
 8. **Headline + Subheadline Options**
 9. **Positioning Narrative**
-

RULES

- Never be vague; always be specific.
 - No fluff — everything must tie to either **perceived value**, **conversion**, or **revenue**.
 - Don't just critique — rebuild.
 - Always explain *why* a change increases value or revenue.
 - Use my brand voice if I request it.
 - Use buyer psychology principles throughout.
-

CONFIRMATION:

Wait for me to upload my offer.
Then begin with STEP 1.

Below are the **three prompts** you requested — each built to take the **output of your newly architected offer** and turn it into a:

1. **Sales Page Copy Generator**
2. **Sales Call Script Generator**
3. **VSL Script Generator**

All three are designed to plug directly into the offer you just created (the Grand Slam Offer + full outline).

You simply paste the **offer output** into each prompt, and each tool will generate world-class marketing assets.

#12 PROMPT: Sales Page Copy Generator

I will paste my **Offer Architect output**, including:

- Offer structure
- Promise
- Mechanism
- Bonuses
- Guarantees
- Pricing
- Value stack
- Unique differentiators
- Positioning narrative

Your job is to turn it into a **complete sales page** that is:

- Clear

- High-converting
 - Emotionally compelling
 - Benefit-driven
 - Mechanism-led
 - Filled with believable proof (with placeholder tags)
 - Built to convert cold or warm traffic
-

TASKS

Produce a **full sales page**, structured in this order:

A. Headline + Subheadline

3–5 versions.

B. Pattern Interrupt / “Call-Out” Opening

C. Future Pacing Section

(Vivid “here’s what your life will look like once you win.”)

D. “Why You’re Stuck” Section

Explain their pain, root causes, and failed attempts.

E. Introduction of the New Mechanism

Explain what makes this offer work.

F. What Makes This Different

Differentiation bullets.

G. Offer Breakdown (Value Stack)

Line-by-line breakdown.

Include **[PROOF INSERT]** placeholders.

H. Bonuses Section

I. Guarantee Section

Make it clear, tangible, and bold.

J. Pricing Section

With anchor → real price → justification.

K. Call-to-Action Section

3 CTA variants.

L. FAQ Section

Cover objections.

RULES

- Match the tone of the offer (friendly, blunt, authoritative, etc.)
- Be specific, not general
- Use buyer psychology
- Keep paragraphs short
- Include **[PROOF INSERT: TYPE]** placeholders

Now I will paste the offer. Create the sales page using the structure above.

#13 PROMPT: Sales Call Script Generator

I will paste my **Offer Architect** output.

Your job is to create a **complete sales call script** that a rep can follow.

STRUCTURE

Build the script using the following flow:

1. Open / Frame

- Set tone
- Explain the agenda
- Establish leadership

2. Discovery Phase

- Pain questions
- Goal questions
- Root-cause analysis
- Time horizon
- Cost of inaction
- Emotional resonance

3. Transition to Pitch

- Confirm what they want
- Confirm fit
- Build anticipation

4. Pitch (Based on Offer Output)

Explain:

- Promise
 - Mechanism
 - How the program works
 - Differentiators
 - What they get
 - Bonuses
 - Guarantees
- Keep it simple, high-level, conversational.

5. Proof Section

Add placeholders: **[INSERT PROOF CLIP/STORY HERE]**

6. Investment & Pricing

Use anchor → real price → rationale.

7. Close

Ask directly.

“Do you want help with this?”

8. Objection Handling

For each common objection:

- Label it
 - Validate
 - Reframe
 - Present solution
- Create a mini-script for each.

9. Final Close

Clear path to yes or no.

RULES

- Tone must be warm, confident, not pushy
 - Questions must be deep and insightful
 - No jargon
 - Tie every recommendation back to the Offer Architect output
 - Use simple language
 - Make the script readable like a real sales conversation
-

Now I will paste my offer. Build the call script using the structure above.

#14 PROMPT: VSL Script Generator

I will paste my **Offer Architect** output.

Your job is to create a **full VSL script** based on the offer and the psychology behind it.

STRUCTURE

Build the VSL using this proven flow:

1. Pattern Interrupt Hook

- Bold statement
- Contrarian point
- Mini-story teaser

2. Big Promise

State the transformation clearly.

3. Identify the Enemy

Explain what's been holding them back.

4. Your Story / Credibility

Short, relevant personal narrative.

5. The Big Discovery

Introduce the mechanism behind the offer.

6. Teaching Section

Demonstrate:

- The new way

- Why the old way fails
- 2–3 insights that position you as the inevitable choice

7. Soft Proof Section

Placeholders: **[INSERT PROOF]**

8. Offer Reveal

Introduce the program/offer clearly.

9. Offer Breakdown / Value Stack

Explain each component and why it matters.

10. Bonuses

11. Guarantee

12. Price Reveal

Anchor → real price → justification.

13. Strong CTA

14. Future Pacing

Show what happens when they join.

15. Tension Close

Pose a clear decision moment.

RULES

- Must follow emotional beats
- Must match tone of offer

- Must avoid hype
- Must include proof placeholders
- Must tell a story
- Copy must sound like a spoken script

Now I will paste my offer. Create the VSL using the structure above.
